RE: Confirmation of the student paper percentage

Dear Editor,

In reference to the above I would like to confirm that the 4% obtained from student paper in my similarity index report is from my own master's thesis titled "Perceptions of the Impact of Mobile Phone use for Social Networking in Malaysia among University students of East African Origin". This paper is accessible through Universti Tunku Abdul Rahman website as that is where I undertook my master's degree. I hereby confirm its my own work and I have not copied it from any other person. I have attached my whole thesis for your kind reference too.

Thank you so much
